Respectfully Submitted,

Construction will include the provision of water equipment to help control dust during operation and Bluestake coordination. Pricing does not include permitting, testing, potholing, revegetation, trimming, traffic control, landscaping, repairs needed for unforeseen underground utilities, and other services not specified above. Given the general vicinity for construction, we do not foresee issue of performing the scope of work described, however pricing does not include any repair to possible damage to pavement, landscaping, curbing, concrete, utilities, etc. Agreeing to this proposal, the client understands that such damage is the cost of performing this type of work.
